

A broader question

BEYOND CODE

What else can an agent harness solve?

ONE SUCH PROBLEM

Video production

creative · tool-heavy · multi-stage · reviewed

The rest of this talk is one answer.

Why Slate?

Video stays with people.

Seen • Felt • Remembered • Shared

PMs

Launches • roadmaps

Slate

Agentic video for business

Walkthrough

High-level architecture

From an idea to a reviewed video

The operating model

Creative freedom. Production discipline.

EASY

Tools + skills

HARD

End-to-end video

Agent creativity

01 Meaning What should this say?

02 Emotion What should it feel like?

03 Story How should it unfold?

04 Visual world How should it look?

05 Treatment Which idea is strongest?

S

L

A

T

E

Deterministic production

✓ **Facts verified** Sources captured

✓ **Direction approved** Human checkpoint

✓ **Assets present** Nothing imaginary

✓ **Timing valid** Audio fits the scene

✓ **Video inspected** Pass before delivery

No reliance on agent memory Choices become visible · approved · checked · repeatable

How durability works

The plan survives the conversation One scene, three layers of evidence

01 —

Preserved artifacts

Current Operating Realities

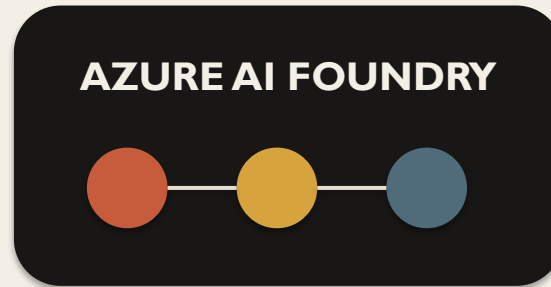

01

A project, not yet a product

Built for exploration and extension, not turnkey adoption.

02

Azure infrastructure required

Foundry resources and model deployments power generated media and speech.

03

Production takes time

Advanced models, video generation, and rendering can take several minutes.

Clear expectations make the experiment stronger.

NEXT STEPS

Get started today

Four ways into the project

- 01** **START**
Clone SlateStudio
Point Copilot or your coding agent to the repository and ask it to set up the workspace.
[Open repository →](#)
- 02** **WATCH**
Some reference videos made using Slate
See complete examples created through the Slate production workflow.
[View videos →](#)
- 03** **JOIN**
General | Slate
Connect with the Slate community for questions, updates, and production notes.
[Open Teams channel →](#)
- 04** **OFFICE HOURS**
Every Wednesday · 11:00 AM PST
Bring a project, a production question, or simply watch Slate work.
[Join office hours →](#)
